PKWARE

PK Protect Data Store Manager

Scan infinite petabytes of data across data stores, databases, and cloud to locate and secure 100% of any business' enterprise data.
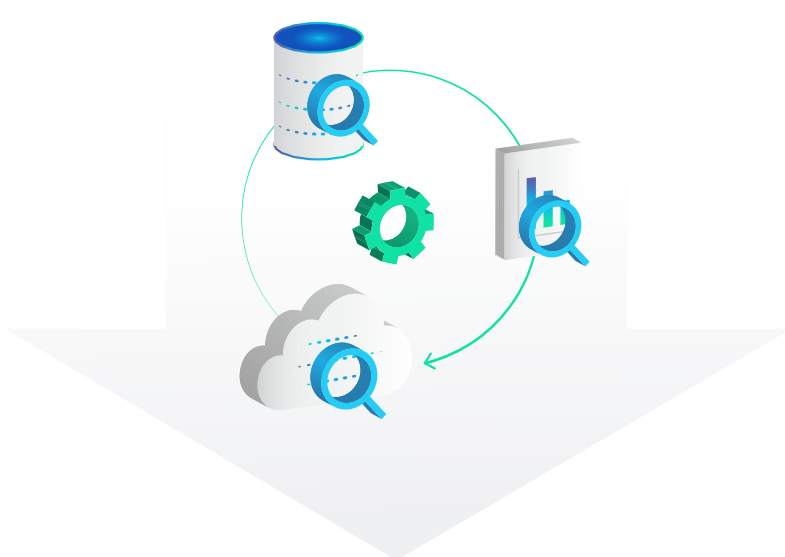

PK Protect
DATA STORE MANAGER

locate → remediate → protect

Protect Data Wherever It Lives and Moves
Scheduled scans for ongoing compliance and protection

Data Discovery

Scheduled scans uncover data in the cloud, in databases and data lakes, and everywhere data is stored across the enterprise

- Databases
- Files
- NoSQL databases
- Hadoop
- Cloud platforms

Remediation

Protect data living and moving between large data repositories and/or cloud according to policy

Masking

Permanently remove all or certain pieces of sensitive information within the database, data lake, or cloud from being revealed and misused

Permanently ▓▓▓▓ all or ▓▓▓ pieces of ▓▓▓▓▓▓ ▓▓▓▓▓ from text files and ▓▓▓▓

Encryption

Automatically convert data into an unreadable format and provide decryption only to those with proper access
